

Urmila Kshirsagar

PYTHON DEVELOPER

PROFESSIONAL SUMMARY

AI & Data Science student with hands-on experience in full-stack development, machine learning, and data analytics. Built scalable applications including financial dashboards, ML models, and AI-based systems. Strong in problem-solving, real-time data insights, and developing user-focused solutions.

EDUCATION

Datta Meghe College of Engineering
B.E. in Artificial Intelligence & Data Science
2023 – 2027

EXPERIENCE

Full Stack Developer Intern – Infosys Springboard

2025

- Developed a Modern Digital Banking Dashboard using React.js, FastAPI, PostgreSQL
- Built modules for transactions, budgeting, bill reminders, and rewards tracking
- Implemented real-time insights (cash flow, spending trends, analytics)
- Integrated APIs and enabled CSV/PDF export with JWT authentication
- Designed scalable architecture and responsive UI

Machine Learning Intern**Prodigy InfoTech**

Jun 2025 – Jul 2025

- Built ML models including classification and clustering algorithms
- Implemented SVM for image classification (Cats vs Dogs dataset)
- Developed customer segmentation system using K-Means clustering
- Created House Price Prediction system using Linear Regression

PROJECTS

1. Modern Digital Banking Dashboard (Full Stack Project)

- Developed a full-stack financial management system using React.js, FastAPI, and PostgreSQL
- Built modules for account management, transactions, budgeting, bill reminders, and rewards tracking
- Implemented real-time analytics like cash flow, spending trends, and financial insights
- Integrated external APIs (ExchangeRate API) for currency conversion
- Added JWT authentication and features like CSV/PDF export
- Designed a scalable architecture with a clean and responsive UI

2. Smart Bite – AI-Based Food Recommendation System

- Developed an AI-powered food recommendation system using React.js, Flask, and MongoDB
 - Built features for personalized meal suggestions, diet planning, and nutrition tracking
 - Implemented calorie and nutrient analysis (protein, carbs, fats) for recommended meals
 - Integrated external APIs for real-time food and nutrition data
 - Added filters for diet preferences and allergies
 - Designed a user-friendly dashboard for tracking daily intake and health goals
 - Developed scalable backend logic for generating customized diet plans
-
